EXPERTISE SUMMARY

AI Security & Governance professional with 5.5+ years delivering enterprise AI risk management, GRC, and Responsible AI programs across financial services, technology, and enterprise clients globally. Expertise spans AI risk assessments, model risk management, and control design aligned to NIST AI RMF, NIST 800-53, ISO 42001, EU AI Act, and ISO 27001. Proven ability to embed AI governance and secure-by-design principles across the full AI/ML lifecycle on multi-cloud environments (AWS, GCP, Azure), and translate GenAI and agentic AI risk exposures into actionable, board-ready risk roadmaps.

PROFESSIONAL EXPERIENCE

Deloitte (USI)

03/2026 – Current | Bengaluru, India

Solution Advisor - Consulting

- Developed firm-wide Secure AI Developer Guide embedded across all SDLC phases, standardizing GenAI risk controls and responsible AI practices for Deloitte Cyber engineers; currently scaling across the broader cyber practice.
- Conducting end-to-end AI and cyber risk assessments for enterprise IT/OT systems, including system architecture, distributed database, and BCP/DR controls, evaluating against NIST 800-53, NIST AI RMF, and ISO 27001 to deliver prioritized risk mitigation roadmaps aligned to client risk appetite.
- Drafting System Security & Privacy Plan (SSPP) responses across all 20 NIST 800-53 control families for enterprise assets, establishing security control baselines and documentation standards to support authorization and compliance readiness.
- Preparing and reviewing client-facing AI governance deliverables including POAMs, SARs, and executive risk summaries, translating AI and cyber risk findings into board-aligned priorities for senior stakeholders across enterprise engagements.
- Supporting full-lifecycle AI security and cyber strategy engagements, coordinating cross-functional workstreams to deliver high-quality, on-time risk advisory deliverables for large enterprise clients across technology and financial services sectors.
- Mentoring junior consultants on AI governance practices and secure SDLC methodologies, conducting peer reviews of engagement deliverables to uphold quality and consistency across AI risk advisory outputs.

Accenture India

10/2021 – 03/2026 | Bengaluru, India

Security Delivery Analyst

- Designed an enterprise AI Security Framework aligned to NIST AI RMF and ISO 42001, standardizing security and privacy controls across ML-powered applications; enabled secure adoption of GenAI and Azure OpenAI services through governance models and standardized AI/GenAI security checklists deployed consistently across enterprise use cases.
- Secured 300+ enterprise applications end-to-end by embedding Secure by Design (SbyD) across Data Security, IAM, Database Security, and Hosting Security, enforcing ITGC and ISO 27001 controls to reduce recurring audit findings and strengthen enterprise compliance posture.
- Drove enterprise GRC alignment across 300+ applications by embedding formal control testing and compliance validation against ISO 27001, ITGC, and ERM frameworks, maintaining ongoing audit readiness aligned to global financial services standards.
- Developed 6+ reusable cloud security assessment assets across GCP, AWS, and Azure, applying ISO 27001 ISMS and CSA Cloud Security Framework from design through build, streamlining compliance reporting and improving consistency across client technology solutions.
- Coordinated cross-functional AI and cyber risk assessments, control gap analysis, and end-to-end remediation tracking using governance dashboards and stakeholder review sessions — partnering with risk owners to resolve audit observations within global compliance timelines.
- Mentored 8+ security engineers on Secure by Design and AI security practices, enabling independent execution of security reviews and scaling AI risk coverage across multiple client engagements.

Tata Consultancy Services Ltd.

11/2020 – 07/2021 | Chennai, India

Associate System Engineer

- Developed and enhanced 10+ financial application features in COBOL/Java with PCI DSS compliance requirements embedded throughout, participating in production release code reviews to validate security and control standards.
- Conducted RCSA assessments across banking modules to identify and track risk remediation; executed Unix-based deployment validation checks to reduce production release security exposure.

EDUCATION

SRKR Eng. College, Andhra University

2020

B.Tech (Bachelor of Technology) : Information Technology

CGPA: 8.54

Narayana Jr College, BIEAP	2016
Intermediate (MPC)	
Percentage: 84.80%	
Narayana e-Techno, BSEAP	2014
SSC	
CGPA: 9.0	

CERTIFICATIONS

- GCP Professional Cloud Security Engineer, Google
- ISO 31000:2018 Risk Management, BSI
- Payment Card Industry Data Security Standard (PCI DSS), BSI
- AWS Certified Solutions Architect - Associate, AWS
- GCP certified Professional Cloud Architect, Google
- Github Copilot GH-300, Microsoft

KEY COMPETENCIES

AI Security & Governance: AI Risk Management, AI Security Framework Design, Responsible AI, GenAI Risk & Controls, Agentic AI Governance, Model Risk Management, AI Lifecycle Security, Trustworthy AI

Frameworks & Compliance: NIST AI RMF, NIST 800-53, ISO 42001, EU AI Act, ISO 27001, ITGC & ITAC, ERM (ISO 31000), CSA Cloud Security, PCI DSS, GDPR & HIPAA

GRC & Risk Advisory: GRC Program Delivery, AI & Cyber Risk Assessments, Control Testing & Gap Analysis, RCSA, TPRM, POAMs & SARs, Audit Remediation Tracking

Secure by Design (SbyD) End-to-end product security framework: Data Security -Data classification, encryption, privacy controls, GDPR alignment, IAM - Identity governance, access controls, privileged access management, Database Security - DB hardening, access reviews, audit logging, vulnerability management, Hosting Security - Multi-cloud security (AWS, GCP, Azure), infrastructure hardening, patch management
